Subject: Hoosick Falls Water Update

Hello All,

This morning the Deputy Mayor, the Town Supervisor and I met with senior administrators at the McCaffrey St plant of St. Gobain. Representatives from the NYS DOH were also present. This meeting was requested by St. Gobain and scheduled last week. The purpose of the meeting was to share the sampling results from St. Gobain's voluntary testing which they initiated in late summer and to discuss the next steps to be taken.

I am pleased to inform you that we have agreed in principle to a plan in which St. Gobain will fund the cost of a GAC filtration system added to the existing municipal water treatment plant. The physical construction will take several months to complete and as a result, St. Gobain will also fund a temporary GAC filtration system which can be operational in a matter of weeks.

There are a number of other related issues which were also discussed and which will be part of a formal agreement to be developed.

This is a significant step forward for our entire community and your advice and guidance has been greatly appreciated.

Thank you.
Dave
